PCAP - Certified Associate in Python Programming

Skills

- Effective communicator: practised in giving presentations and working with colleagues in a high stress environment.
- Efficient at problem solving: will search for new tasks to complete good at finding new solutions to problems.
- Team working: capable of communicating with a team and filling a role within a group but can also work effectively alone when needed.
- Excellent IT skills: familiar with varied software including Microsoft office and windows server.
- Took part in the Digital People Python course with the Prince's Trust in order to gain a proficiency with Python and familiarity with other programming languages.
- Familiar with object orientated programming in both Python and Java and comfortable with using either to complete projects.
- Currently enrolled in the Google IT support course to get a stronger grasp of the OSI model and the inner workings of network services.
- Experienced with full stack web development and have produced a website using Apache and MySQL. Some experience with JavaScript and using Scripts within websites.
- As I have a deep love of Japan and Japanese media, I am currently learning Japanese. I would evaluate my ability to be at around N4 level currently.
